Case Study – Buffer Planting Redland City Council – Wellington Point, Queensland

Project Objective

- Revegetation for habitat and urban greening

Project overview

- Paddock spraying
- Deep ripping of planting strips
- Mulch installation
- Supply and installation of native plants
- 2 years maintenance

Challenges

- Short lead time for completion of works
- Hard to control weed species
- Compacted soil from previous land uses

Environmental benefits

- Buffer zone from neighboring land uses for adjoining properties
- Addition to areas of native vegetation and koala habitat
- Control of environmental weeds
