Land Management Contractors

## Case Study - Koala Habitat Planting Department of Environment and Resource Management Smith St Capalaba, Queensland

### Project Objective

- Repair degraded landscape and revegetation with koala food and shelter trees

### Project overview

- 2.5 ha vegetation reinstatement
- Extensive site preparation and weed control
- High quality fence installation
- Supply and installation of 400 m<sup>3</sup> of mulch
- Planting and establishment of 2,500 koala habitat trees
- Five years of maintenance and monitoring

### Challenges

- Short lead time for completion of works
- Extensive weed infestation
- Poor soil conditions requiring soil testing and subsequent soil amendments and an extensive fertiliser program to achieve good tree development
- Difficult access

### Environmental benefits

- Enhancement of existing koala bush land
- Removal of rubbish
- Protection from unapproved land uses
- Long term weed management program
